I claim:

- 1. A process for producing a fertilizer impregnated with an agriculturally active chemical comprising contacting a particulate fertilizer with a liquid impregnating composition comprising at least 5 wt.% of the agriculturally active chemical dissolved in an organic liquid carrier having a flash point above ~38° C (100° F) and exhibiting a Primary Irritation Score under 16 CFR 1500.3(c)(4) of 5 or less.
- 2. The process of claim 1, wherein the impregnating composition comprises at least 10 wt.% of the agriculturally active chemical and further wherein the organic liquid carrier exhibits a Primary Irritation Score under 16 CFR 1500.3(c)(4) of 1.5 or less.
- 3. The process of claim 2, wherein the organic liquid carrier is a pyrrolidone, lactone or mixtures thereof.
- 4. The process of claim 3, wherein the organic liquid carrier is N-methyl pyrrolidone, γ -butyrolactone or mixtures thereof.
- 5. The process of claim 4, wherein the organic liquid carrier is N-methyl pyrrolidone.
 - 6. The process of claim 5, wherein the agriculturally active chemical is prodiamine.
- 7. The process of claim 6, wherein the liquid impregnating composition contains 10-50 wt.% prodiamine.
- 8. The process of claim 7, wherein the particulate fertilizer is a lawn fertilizer having a particle size of about 6.5 mm to 0.25 mm and a bulk density of about 0.05 to 1.5 gms/cc.
- 9. The process of claim 8, wherein the liquid impregnating composition is sprayed on the particulate fertilizer in an amount to provide a fertilizer product containing about 0.1 to 2 wt.% prodiamine.
- 10. A fertilizer product comprising a particulate fertilizer substrate impregnated with an agriculturally active chemical, the fertilizer product containing from a trace amount to about 10 wt.% of an organic liquid carrier capable of dissolving the agriculturally active chemical in a concentration of at least 5 wt.%, the organic liquid carrier having a flash point above ~38° C (100° F) and exhibiting a Primary Irritation Score under 16 CFR 1500.3(c)(4) of 5 or less.
- 11. The fertilizer product of claim 10, wherein the fertilizer product contains about 0.01 wt.% to 5 wt.% of the organic liquid carrier.

- 12. The fertilizer product of claim 11, wherein the fertilizer product contains about 0.2 to 1.5 wt.% of the organic liquid carrier.
- 13. The fertilizer product of claim 10, wherein the organic liquid carrier is a pyrrolidone, lactone or mixtures thereof.
- 14. The fertilizer product of claim 13, wherein the organic liquid carrier is N-methyl pyrrolidone, γ-butyrolactone or mixtures thereof.
- 15. The fertilizer product of claim 14, wherein the organic liquid carrier is N-methyl pyrrolidone.
- 16. The fertilizer product of claim 15, wherein the agriculturally active chemical is prodiamine.
- 17. The fertilizer product of claim 16, wherein the fertilizer product contains about 0.1 to 2 wt.% prodiamine and about 0.2 to 1.5 wt.% N-methyl pyrrolidone.
